

# Oracle Agile Product Lifecycle Management

cd|group

ORACLE CERTIFIED ADVANTAGE PARTNER

Oracle® Agile Product Lifecycle Management (Agile PLM) manages the enterprise product record, the single system of record for product information required to maximize profitability throughout the lifecycle. Containing the rich information that uniquely defines all aspects of a product at each stage in its lifecycle, the product record includes all of the information required by an enterprise and its extended design and supply chain to conceptualize, design, source, build, sell, service, and dispose of products.

Through a broad suite of best practice, business-ready solutions, Agile PLM provides secure, timely, visibility and control of product information for PLM processes and for stakeholders across a global product network. Agile helps companies accelerate revenue, drive innovation, reduce costs, improve quality, and ensure regulatory compliance throughout the product lifecycle.

## Benefits

- **Agile Product Collaboration**—Helps users share product data and structure and manage change across the global product network
  - **Agile Product Cost Management**—Enables companies to manage product costs through early and real time cost visibility
  - **Agile Product Quality Management**—Drives improved product quality and customer satisfaction by integrating customer, product, quality and regulatory information within a closed-loop corrective action system
  - **Agile Product Governance & Compliance**—Enables organizations to manage product, substance, material compliance against standards and regulatory requirements
  - **Agile Engineering Data Management**—Organizes and manages product design assets to support globally distributed engineering teams
- **Agile Product Portfolio Management**—Provides tightly synchronized program and product information, maximized resource utilization, and cross-program visibility and decision support throughout the product lifecycle
  - **Agile Engineering Collaboration**—Ensure that engineering processes are fully leveraged throughout the product lifecycle driving engineering best practices across the enterprise
  - **AutoVue Electro-Mechanical Professional for Agile**—Provides native document visualization across a global enterprise for over 450 file formats
  - **Agile Variant Management (e6)** —Provides a best-practice approach to managing portfolios of related products and product variants across the life cycle

## CD Group Inc. and Oracle

Founded in 1992, CD Group, Inc. is a leading provider of Enterprise application and technology solutions.
